Anders Beck

SENIOR FULL STACK DEVELOPER

Profile

I am a committed full stack developer with broad technical knowledge, a "Swiss Army Knife" with experience in every part of the stack from front to back. My focus is on transforming problems into clever digital solutions with the user at the center. I am skilled in bridging the gap between users and developers by understanding and communicating with both parties, enabling me to see problems from multiple angles. I am motivated by combining different technologies to create solutions that are greater than the sum of their parts and deliver value. With a passion for learning, I always challenge myself to discover new tools and tackle problems that I couldn't previously solve.

Employment History
